Media Archive Backup and Disaster Recovery Service Level Agreement

Schedule 4 to the preservation services agreement between Beacon Broadcasting Ltd and Lumen Vault Ltd — Version 1.0

Document reference	LMV-SLA-2026-4410
Schedule	Schedule 4
Version	1.0
Effective date	1 July 2026
Supersedes	None — initial issue
Next review	1 July 2027
Customer	Beacon Broadcasting Ltd (the “Customer”)
Provider	Lumen Vault Ltd (the “Provider”)
Asset Groups in scope	8 Asset Groups, listed in Appendix A
Amendments	Amendment No. 1 dated 3 October 2026, effective 1 December 2026

Version	Date	Description	Status
1.0	1 July 2026	Initial issue	In force

Appendix C — Worked Service Credit Examples
Amendment No. 1

1. Purpose, Scope and Precedence

1.1 This Schedule sets out the service levels for the preservation, backup and disaster recovery of the Customer's media archive, the remedies where those levels are not met, and the governance by which performance is reported. It applies only to the Asset Groups listed in Appendix A.

1.2 The following are out of scope: assets not listed in Appendix A; the Customer's production and edit infrastructure; material held on removable media in the Customer's own buildings; and any Asset Group the Customer has designated in writing as unmanaged.

1.3 Where documents conflict the following order applies, higher prevailing: (i) any Amendment to this Schedule; (ii) this Schedule and its Appendices; (iii) the Rights and Clearances Agreement; (iv) the main preservation services agreement. Where this Schedule and the Rights and Clearances Agreement each set a period for releasing Embargoed material, the **longer** period applies, so that an embargo is never shortened by this Schedule.

Note 1.3(a): An Amendment takes effect only on the date stated in it.

2. Definitions

Term	Definition
Archive Class	Broadcast, Production, Library or Scratch, as assigned to an Asset Group in Appendix A.
Asset Group	A discrete collection of media assets listed in Appendix A and assigned an Archive Class and a Rights Category.
Checksum Verification	An automated fixity check of stored media against its recorded checksum, performed at the cadence in Table 3.1.
Format Migration	Transcoding or rewrapping of stored media into a current preservation format, carried out at the review interval in Table 3.1.
Media Refresh	Copying stored media onto new physical carriers before the end of the carrier's rated life, at the interval in Table 3.1.
Monthly Asset Group Fee	The recurring charge for an Asset Group set out in Appendix A, per 100 TB stored, excluding VAT.
Portal	The Provider's search and retrieval interface through which the Customer locates and requests media.
Proxy	A low-resolution viewing copy of an asset, retained alongside the preservation master where Table 3.1 provides for one.
Recovery Point Objective (RPO)	The maximum tolerable period of data loss for an Asset Group, measured as the interval between the most recent verified copy and the moment of failure.
Recovery Time Objective (RTO)	The maximum tolerable period between the Customer submitting a valid restore request and the first restored asset being available to the Customer.
Restore Throughput	The sustained rate, in terabytes per hour, at which the Provider delivers restored media once a restore has begun, measured over the whole of a restore of 1 TB or more.
Rights Category	Rights-cleared, Licence-limited, Embargoed or Unclassified, as assigned to an Asset Group in Appendix A.
Service Month	A calendar month during which the services are provided.
Verified Copy	A stored copy that has passed its most recent Checksum Verification.

Table 2.1 — Defined terms.

In this Schedule: (a) “including” means including without limitation; (b) a percentage measured over a Service Month is calculated to two decimal places and rounded half-up; (c) a figure that rounds to exactly the committed value is treated as meeting the commitment; and (d) a terabyte means 1,000 gigabytes.

3. Archive Classes and Objectives

3.1 Class matrix

Each Asset Group is assigned one Archive Class. Where a value in this table conflicts with a requirement arising from the Rights Category, clause 7.3 governs.

Attribute	Broadcast	Production	Library	Scratch
Recovery Point Objective (RPO)	15 minutes	2 hours	24 hours	Not provided
Recovery Time Objective (RTO)	1 hour	6 hours	48 hours	Best efforts

Attribute	Broadcast	Production	Library	Scratch
Restore Throughput	8 TB/hour	4 TB/hour	1 TB/hour	0.25 TB/hour
Copies maintained	4	3	3	1
Distinct media types	3 — object, LTO tape, offline tape	2 — object, LTO tape	2 — object, LTO tape	1 — object
Offsite vaults	2 vaults	1 vault	1 vault	None
Checksum Verification cadence	Weekly	Monthly	Quarterly	Not performed
Media Refresh interval	5 years	7 years	10 years	Not applicable
Format Migration	On each 3-year format review	On each 3-year format review	On each 5-year format review	Not provided
Minimum retention	Perpetual	10 years from last transmission	7 years from ingest	30 days
Proxy retained	Yes — low-resolution proxy retained	Yes	No	No
Service credit cap (per Service Month)	40%	35%	25%	10%
Monthly Asset Group Fee, per 100 TB	€2,100	€1,150	€480	€95

Table 3.1 — Archive Class matrix. Values are Class defaults and may be overridden by a Rights Category requirement under clause 7.3 or by Amendment.

3.2 Class reassignment

The Customer may move an Asset Group to a different Archive Class on thirty days' written notice, effective the first day of the following Service Month. A move to a lower Class does not permit the Provider to delete copies already held; existing copies are retained until the retention period for the new Class expires.

4. Ingest and Verification

4.1 Media is accepted into the archive only once a checksum has been recorded at ingest and a Verified Copy exists in at least two locations. Until that point the asset is not covered by the objectives in Table 3.1.

4.2 Checksum Verification is performed at the cadence in Table 3.1 across a rolling sample of each Asset Group, such that every asset is verified at least once within four verification cycles.

4.3 Where a Checksum Verification fails, the Provider shall restore the affected asset from another Verified Copy, re-record the checksum and notify the Customer within 4 hours. A failure where no other Verified Copy exists is a reportable preservation incident and must be escalated immediately.

4.4 The RPO is assessed continuously. No more than one RPO breach is recorded for an Asset Group in any rolling 24-hour period.

5. Restores and Throughput

5.1 The RTO runs from receipt of a valid restore request to the first restored asset being available. Restore Throughput is measured separately, over the whole of any restore of 1 TB or more, and is the sustained delivery rate once the restore has begun.

5.2 Where a restore spans more than one Archive Class, the objectives of the **highest** Class in the request apply to the whole restore.

5.3 Restores of Embargoed material require written release from the Customer's Head of Rights. The RTO clock does not start until that release is received.

5.4 A restore requested outside the Provider's staffed hours for a Library or Scratch Asset Group begins at the start of the next staffed period.

6. Preservation Obligations

6.1 The Provider shall carry out Media Refresh at the interval in Table 3.1, measured from the date the carrier was written, and shall certify each refresh in the monthly report.

6.2 The Provider shall carry out a Format Migration at the review interval in Table 3.1 where the preservation format is assessed as at risk. Migration must preserve all embedded metadata and must retain the pre-migration copy for 12 months.

6.3 A disaster recovery exercise is carried out **annual**, with at least **15 Business Days'** notice, and must demonstrate restoration of a sampled asset from each offsite vault. A failed exercise must be re-run within 30 days.

7. Rights Categories

7.1 Each Asset Group is assigned a Rights Category in Appendix A.

Rights Category	Description	Retention and release
Rights-cleared	Material cleared for unrestricted re-use	Perpetual
Licence-limited	Material held under a time-limited licence	Until licence expiry, then delete within 90 days
Embargoed	Material subject to a contractual embargo	Held but not restorable without written release
Unclassified	Material not yet assessed	Treated as Licence-limited until assessed

Table 7.1 — Rights Category requirements.

7.2 Embargoed material is stored and verified as normal but is not restorable without written release under clause 5.3. An embargo does not reduce any preservation obligation in clause 6.

7.3 **Rights Category overrides.** Where the Archive Class value in Table 3.1 and the Rights Category requirement in Table 7.1 differ, the requirement producing the **longer** retention governs. A Rights Category never shortens a retention period set by the Archive Class.

8. Portal Availability

8.1 The Provider commits to Portal availability of **99.5%** per Service Month, measured by an authenticated search every 60 seconds from three locations, the Portal being unavailable in a minute where at least two of the three fail.

8.2 Portal unavailability does not extend any RTO. Where the Portal is unavailable the Provider shall accept restore requests by telephone.

9. Service Credits

9.1 Where the Provider misses an objective for an Asset Group in a Service Month, the Customer is entitled to a credit expressed as a percentage of that Asset Group's Monthly Asset Group Fee.

9.2 **Restore Throughput.** A credit of **3%** applies for each terabyte per hour, or part of a terabyte per hour, by which the measured throughput falls below the objective, counting a maximum of **4** increments. A part of a terabyte per hour counts as a whole increment.

9.3 **RPO.** A credit of **5%** for each RPO breach, maximum **3** per Service Month.

9.4 **RTO.** A credit of **7%** for each restore not meeting the RTO, maximum **2** per Service Month.

9.5 **Checksum Verification.** A credit of **4%** for each verification cycle not completed at the required cadence, maximum **3** per Service Month.

9.6 **Portal.** Where Portal availability is below 99.5%: **3%** where at or above 98.0%, and **8%** where below it.

9.7 **Late report. 2%** per Asset Group for each monthly report delivered late, up to **3** per contract year.

9.8 Credits are added together for the Asset Group and Service Month and limited to the cap for its Archive Class in Table 3.1. No credit is due where the failure falls within Appendix B.

9.9 The Customer must claim within **30 days** of the monthly report. The Provider must respond within **10 Business Days**.

9.10 Loss of an asset for which no Verified Copy remains is not remedied by a service credit and is dealt with under the liability provisions of the main agreement.

10. Reporting, Maintenance and Testing

10.1 The Provider delivers a monthly report within **10 Business Days** of the end of each Service Month, showing per Asset Group: verification cycles completed, RPO breaches, restores with RTO and throughput achieved, Media Refresh and Format Migration carried out, Portal availability and credits due.

10.2 Planned maintenance is carried out only in the window **Mondays 02:00 to 06:00 UTC**, must not exceed **8 hours** in any Service Month, and requires at least **7 days'** notice.

10.3 The Customer may audit the Provider's compliance **once** in any contract year on **30 days'** notice, including physical inspection of an offsite vault.

10.4 The Provider shall notify the Customer's Head of Technology of any security incident affecting stored media within **24 hours** of becoming aware of it.

11. Chronic Failure and Exit

11.1 A **Chronic Failure** occurs for an Asset Group where it misses its Restore Throughput objective in at least **3** of any **6** consecutive Service Months, or where any Checksum Verification failure leaves no Verified Copy.

11.2 On a Chronic Failure the Customer may terminate in respect of that Asset Group on **60 days'** notice without charge.

11.3 On termination the Provider shall deliver the Customer's media for up to **120 days**, at a rate of at least **40 TB per day**, together with the checksum manifest and all catalogue metadata, at no charge.

12. Change Control

12.1 Changes require a written variation signed by both parties. Adding or removing an Asset Group, or changing its Archive Class or Rights Category, is effected by an Appendix A entry confirmed by email.

Appendix A — Asset Group Inventory

Asset Group ID	Description	Archive Class	Rights Category	Fee per 100 TB
BCN-NEWS-01	Daily news rushes and packages	Broadcast	Rights-cleared	€2,100
BCN-LIVE-02	Live sport multi-camera feeds	Broadcast	Licence-limited	€2,100
BCN-DRAM-03	Drama production masters	Production	Licence-limited	€1,150
BCN-DOCU-04	Documentary production masters	Production	Rights-cleared	€1,150
BCN-ARCH-05	Historic programme library	Library	Rights-cleared	€480
BCN-MUSI-06	Music session recordings	Library	Licence-limited	€480
BCN-RAW-07	Unassessed acquisition tapes	Library	Unclassified	€480
BCN-EDIT-08	Edit suite working storage	Scratch	Unclassified	€95

Table A.1 — Asset Group inventory.

Asset Groups by Archive Class: Broadcast 2, Production 2, Library 3, Scratch 1. Sum of the Monthly Asset Group Fees across all 8 Asset Groups, each taken at 100 TB: **€8,035** per Service Month, being **€96,420** per contract year. Actual invoicing is per 100 TB stored.

Note A.1: BCN-RAW-07 is Unclassified and is treated as Licence-limited until assessed, under Table 7.1.

Appendix B — Exclusions

Ref	Event	Treatment
B.1	Media supplied by the Customer that is physically damaged or unreadable at ingest.	Not accepted into the archive; no objective applies under clause 4.1.
B.2	A restore request for Embargoed material without written release.	The RTO clock does not start (clause 5.3).
B.3	Throughput limited by the Customer's own network or destination storage.	No credit. The Provider must evidence the limit.
B.4	Planned maintenance within its notified window under clause 10.2.	Minutes excluded from Portal availability.
B.5	Force majeure, including flood, fire and national emergency.	No credit.
B.6	A restore of less than 1 TB.	Restore Throughput is not measured (clause 5.1); the RTO still applies.
B.7	An Asset Group designated by the Customer in writing as unmanaged.	Out of scope under clause 1.2.

Table B.1 — Exclusions referred to in clause 9.8.

Appendix C — Worked Service Credit Examples

C.1 — BCN-NEWS-01, Daily news rushes and packages (Broadcast Class, Rights-cleared, fee €2,100 per 100 TB), August 2026.

Restore Throughput 5.5 TB/hour against 8 TB/hour, so 3 increment(s) × 3% = **9%**; 2 RPO breach(es), maximum 3: 2 × 5% = **10%**; 1 restore(s) outside the RTO, maximum 2: 1 × 7% = **7%**; 1 missed verification cycle(s), maximum 3: 1 × 4% = **4%**; Portal availability 99.7% against 99.5%: **0%**. Sum **30%**; cap for Broadcast is **40%**; the sum is within the cap, so the credit is **30% of €2,100 = €630.00**.

C.2 — BCN-DRAM-03, Drama production masters (Production Class, Licence-limited, fee €1,150 per 100 TB), September 2026.

Restore Throughput 4 TB/hour meets the objective: **0%**; Portal availability 98.6% against 99.5%: **3%**; monthly report late: **2%**. Sum **5%**; cap for Production is **35%**; the sum is within the cap, so the credit is **5% of €1,150 = €57.50**.

C.3 — BCN-ARCH-05, Historic programme library (Library Class, Rights-cleared, fee €480 per 100 TB), October 2026.

Restore Throughput 0.2 TB/hour against 1 TB/hour, so 1 increment(s) × 3% = **3%**; 4 RPO breach(es), maximum 3: 3 × 5% = **15%**; 3 restore(s) outside the RTO, maximum 2: 2 × 7% = **14%**; 2 missed verification cycle(s), maximum 3: 2 × 4% = **8%**; Portal availability 97.2% against 99.5%: **8%**; monthly report late: **2%**. Sum **50%**; cap for Library is **25%**; the sum exceeds the cap, so the credit is **25% of €480 = €120.00**.

Amendment No. 1

Agreed on **3 October 2026** between Beacon Broadcasting Ltd and Lumen Vault Ltd. Unless stated otherwise it takes effect on **1 December 2026** and has no effect before that date.

A1.1 In Table 3.1 the Restore Throughput objective for the **Library** Class is increased to **2 TB/hour**.

A1.2 In Table 3.1 the Checksum Verification cadence for the **Production** Class is changed to **Fortnightly**.

A1.3 In clause 9.9 the claim period is extended to **45 days**.

A1.4 With effect from **1 September 2027**, and not before, the Checksum Verification cadence for the **Library** Class changes to **Monthly**.

A1.5 All other terms of this Schedule remain unchanged.
